

After all the hard work invested into forking  
and building upon a passive yield farming  
protocol, we want to make sure a cohesive  
brand design follows suite

## Primary logo

Fantohm's upgraded identity is something the team cherishes. Voted by the most enthusiastic community members, it now has no sharp corners and is slick to look at. We have kept the bright and comfortable Honey and Gold colors, but also made the middle of our cute ghost more simple. Unbothered, happy, curious even. This is the ethos of Fantohm and our very warm community.

### Minimum size

The smallest the logo should be represented is 100px high.

## **Secondary logo**

Fantohm's secondary logo is interchangeable to the primary logo, but should never be used next to the primary logo. For instance, the secondary logo shouldn't be used as the profile picture if the primary logo is used for the header – it looks repetitive and isn't a good use of the brand elements.

## Colors

We decided on 4 base colors for our new logo. When we have a Navy or White background, we accent our logo with a beautiful blend of Gold and Honey. This contrast brings out the simple yet elegant elements. When the background is Honey, we do the opposite and contrast that with a blend of Navy and Smog.

## Typography

Typography is a powerful brand tool when used consistently. This set of typefaces best represents the bold and modern feel of the brand and should be used in all print and web applications.
